Bella Dama

ReVital

The dream of a glowing skin comes true

5 Vials
of 10 Ml

Healthy skin - Brightness - Dermal thickness - Elasticity and tone
Uniform pigmentation - Reduced pores size

The real lifting effect

Sterile cosmetic solution for skin rejuvenation based on hyaluronic acid, polydeoxyribonucleotide and argireline to restore skin elasticity and firmness, improve collagen synthesis and restore youthful appearance.

Reduces fine wrinkles, large pores and hyperpigmentation.

A nourished, renewed, luminous and smooth skin and a real lifting effect are obtained thanks to the explosive synergy of its ingredients.

INGREDIENTS

HYALURONIC ACID, has a biostimulating action on fibroblasts and improves hydration, regulates melanocytes activity, promotes collagen synthesis and skin elasticity

PDRN (Polydeoxyribonucleotide) acts through the adenosine receptors stimulating angiogenesis, tissue repair and protects skin from the UVA-UVB damage. It gives an immediate radiance to the skin and improves its complexion.

ARGIRELINE (Acetyl Hexapeptide-8) is a peptide which is a fragment of SNAP-25, a substrate of botulinum toxin. It decreases the visible effects of aging by reducing the deep wrinkles and lines that occur all over the face, neck and décolleté.

ReVital

5 Vials - 10 Ml
