MED ESTHETICS

ITALIAN RESEARCH AND INNOVATION

BioReTherapy

It is a complete aesthetic medical treatment for topical use,
painless, without needles and suitable for every area of the body.

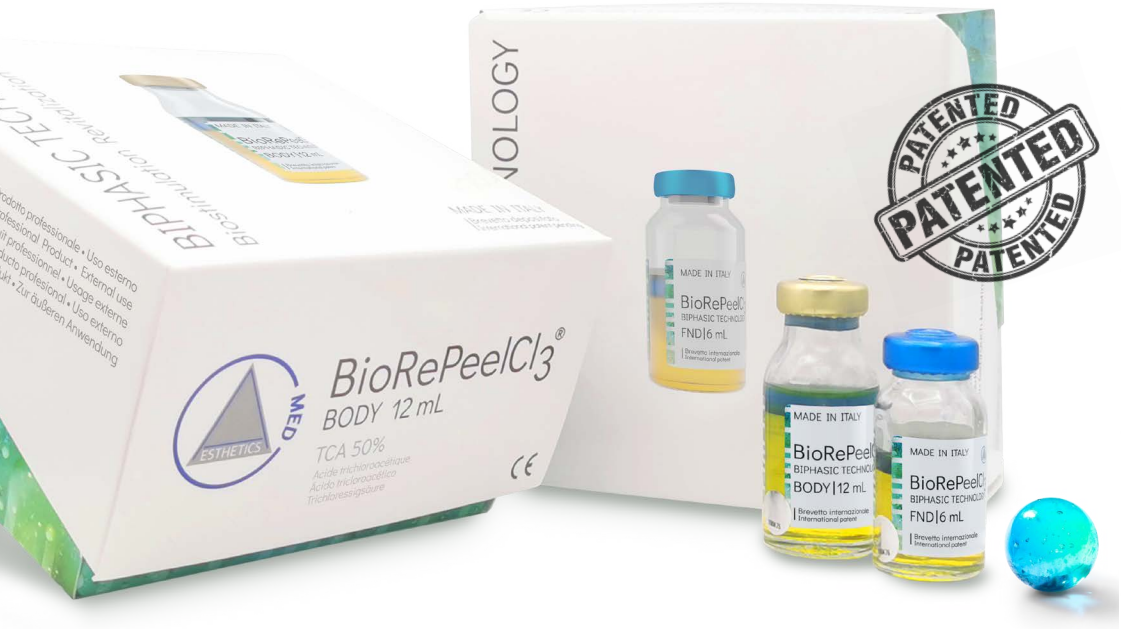

MADE IN ITALY

BioRePeelCl3®

BIPHASIC TECHNOLOGY

Biostimulation Revitalization Peeling

It is an innovative, biphasic, patented medical device with a biostimulating, revitalizing and peeling action.

Thanks to exfoliating and keratolytic action, it promotes cell turnover by removing the outer corneal layer cells with selective action on corneocytes' junction bonds.

The active ingredients' dermofunctionality contributes to a profound stimulation of skin replication and biosynthetic processes, essential to counter the effects of skin aging and oxidative damage induced by UV radiation and pollution.

BioRePeelCl3® is manufactured according to pharmaceutical standards to guarantee the highest quality levels of MADE IN ITALY.

You can use BioRePeelCl3® also in synergy with other treatments to improve their performance and result:

- INJECTABLE TREATMENTS (before)
- PHOTOSTIMULATION (before)
- RADIOFREQUENCY (after)
- TOPICAL TREATMENT (before)

NO NEEDLES

PAINLESS

FAST

MULTIFUNCTIONAL

IMMEDIATE RESULT

NO POST TREATMENT SIGNS

FOR THE WHOLE BODY

FOR ALL AGES

FOR ALL SKIN TYPES
(Fitzpatrick scale 1-6)

FOR EVERY SEASON

NOT PHOTOSENSIBILIZATION

BioRePeelCl3®
FND|6 mL

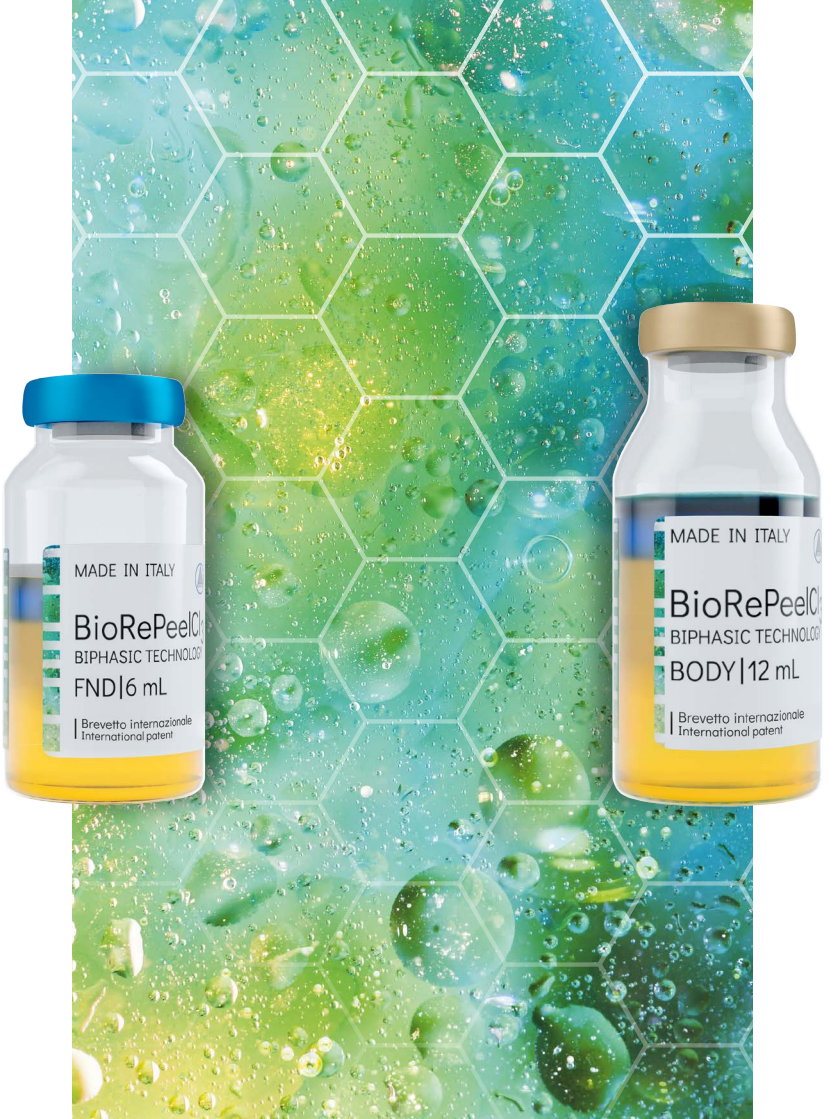

Face | Neck | Dècolletè

- **Trichloroacetic Acid 35%**
- Lactobionic Acid
- Salicylic Acid
- Tartaric Acid and Citric Acid
- Glycine, Proline, Hydroxyproline and Arginine
- Vitamins C and B2
- *gamma*-Aminobutyric Acid
- Squalane
- Isoprpil Myristate

FORMAT 5 AMPOULES 6 mL

PROTOCOL OF USE: Treat the interested part every 7-10 days for 4-6 sessions depending on medical evaluation and treatment targets.
Exposure time: 3-5 minutes according to patient's perception.

BioRePeelCl3®
BODY|12 mL

Hands | Elbows |Glutes | Knees | Feet

- **Trichloroacetic Acid 50%**
- Lactobionic Acid
- Salicylic Acid
- Tartaric Acid and Citric Acid
- Glycine, Proline, Hydroxyproline and Arginine
- Vitamins C and B2
- *gamma*-Aminobutyric Acid
- Squalane
- Isoprpil Myristate

FORMAT 3 AMPOULES 12 mL

PROTOCOL OF USE: Treat the interested part every 10-12 days for 4-6 sessions depending on medical evaluation and treatment targets.
Exposure time: 3-10 minutes according to patient's perception.

BioRePeelCl3® is a biphasic sytem, the blue phase is LIPOPHILIC and the yellow phase is HYDROPHILIC.

LIPOPHILIC FASE

• STABILIZING AND PROTECTIVE ACTIONS It prevents trichloroacetic acid oxidation and stabilizes the formulation separating the aqueous phase from oxidating atmosphere inside the ampoule. It consequently improves performance and effectiveness of the product.

• FILMING AND VEHICULATING ACTIONS It reduces trans-epidermic water evaporation and assists active principles vehiculation.

• RIGENERATING ACTION It restores and maintains cutaneous hydro-lipidic film.

• MOISTURIZING ACTION It increases hydration through direct and indirect mechanisms.

HYDROPHILIC FASE

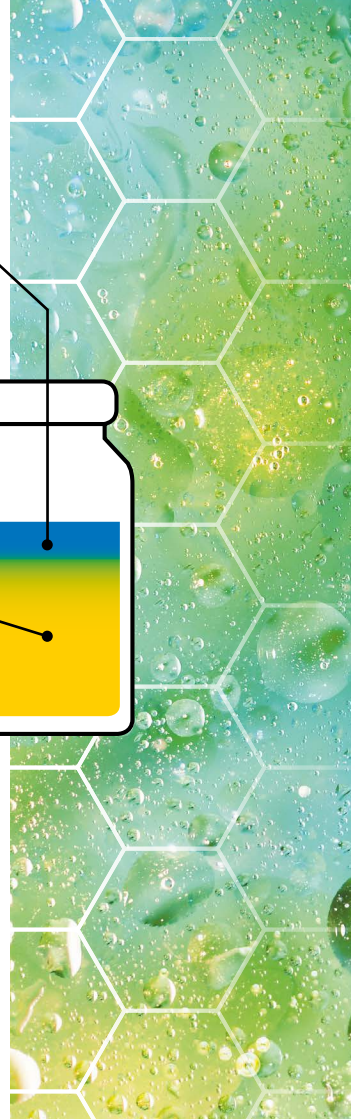

• BIOSTIMULATING ACTION It stimulates fibroblasts' activity and activates cutaneous proliferating and biosynthetic processes.

• REVITALIZING ACTION It increases cellular turnover and production of collagen, elastin and hyaluronic acid.

• KERATOLYTIC AND PEELING ACTIONS It removes outer cells of stratum corneum by breaking corneocytes' adesion bonds. This process promotes active principles penetration.

• ANTI-AGING AND ANTIOXIDANT ACTIONS It reduces fine lines by neutralization of free radicals.

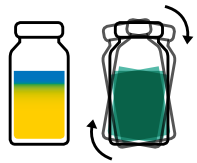

• ANTI ACNE ENLARGED PORES COMEDONES It helps battling acne, it eliminates comedones and it has an astringent effect on enlarged pores.

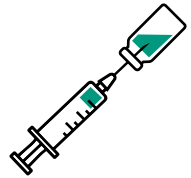

BioRePeelCl3®

HOW TO USE

1. Shake the ampoule for a few seconds until colour turns green for a temporary emulsion.

2. Using a syringe, prelate the quantity of product for the treatment. REMOVE THE NEEDLE.

3. Apply the product with nitrile gloves on treated area and massage until it is completely absorbed.

4. After the exposure time, carefully clean the zone with a gauze soaked with water.

N.B. After a few minutes the product will return to its initial biphasic state. It is necessary to shake the ampoule before every use.

BioReHydra

Post Treatment Serum

Face | Body | Specific for Oily Skin

It is presented as a hydrogel with a light, fast-absorbing texture that gives a fresh, moisturizing and lifting skin feel.

The formulation contains *over 15 active principles* like:

- Micronized Hyaluronic Acid 5-10 Kda
- Oceanic extracts:
  - Indian Ocean - Caulerpa Lentillifera Extract
  - Atlantic Ocean - Ascophyllum Nodosum Extract, Halopteris Scoparia Extract
  - Pacific Ocean - Macrocystis Pyrifera Extract
- Vitamins B2 and C Protected (Ascorbyl Glucoside)
- GABA
- Amino acids: Glycine, Proline, Hydroxyproline, Lysine, Leucine, Isoleucine, Valine and Arginine.

FORMAT 30 mL - 200 mL

USE : After the biostimulating peeling treatment, apply on the treated area, massaging until completely absorbed. In the following days, continue to apply it in the morning and in the evening. For NORMAL OR COMBINATION SKIN, it is recommended to combine it with the BioReLift Post Treatment Cream.

BioReLift

Post Treatment Cream

Face | Body | Specific for Dry Skin

It is presented as a light emulsion of easy absorption, with a silky texture and a soft and enveloping skin feel.

The formulation contains *over 20 active principles* like:

- 4 Biomimetic peptides enhanced by colloidal platinum: Dipeptide diaminobutyroyl benzylamide, Copper palmitoyl heptapeptide-14, Heptapeptide-15 palmitate, Acetyl tetrapeptide-17
- Micronized Hyaluronic Acid
- Panthenol
- Vitamins E, B2 and C Protected (Ascorbyl Glucoside)
- Amino acids: Arginine, Glycine, Proline, Leucine, Lysine, Isoleucine and Valina.
- Almond and Argan Oil
- Shea Butter
- Bisabolol

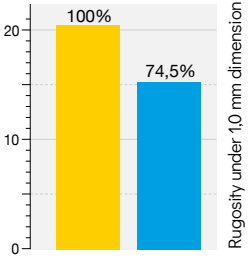

FORMAT 30 mL - 200 mL

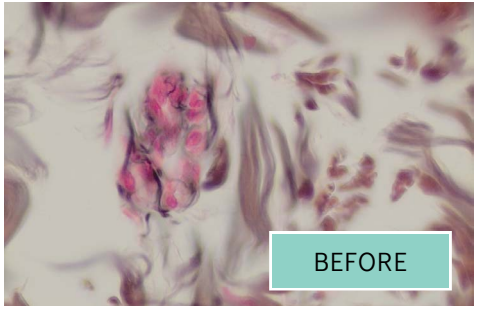

USE : After the biostimulating peeling treatment, apply on the treated area, massaging until completely absorbed. In the following days, continue to apply it in the morning and in the evening. For NORMAL OR COMBINATION SKIN, it is recommended to combine it with the BioReHydra Post Treatment Serum. It is perfect also as make-up base.

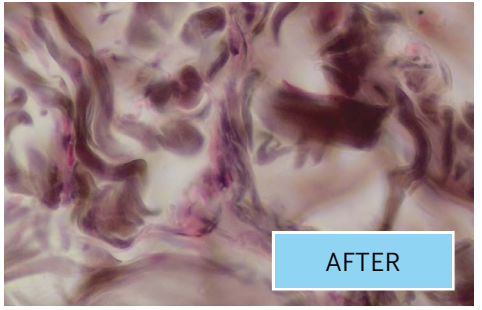

COLLAGEN STIMULATION AND FINE LINEDISTENSION

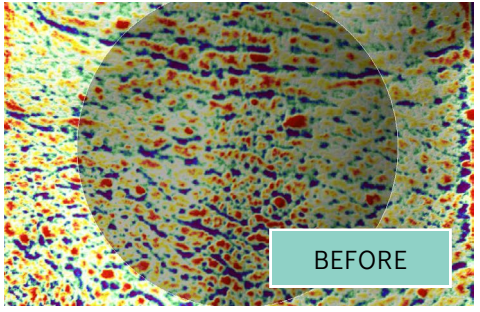

EPIDERMIS: The Gomori staining highlights a regular regrowth of the epidermis with a regular distribution of the external cellular layer of the skin. It is also well evident the regular keratinization without an excessive post-treatment stress.

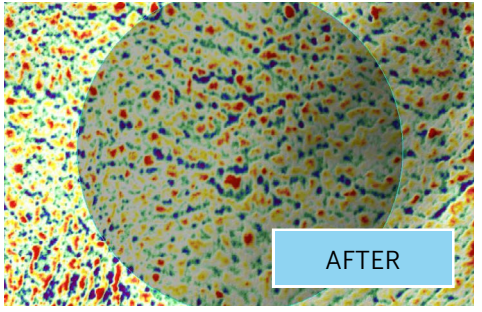

DERMIS: In the dermis there is a stimulation of the microcirculation with evidence of tonic and well organized collagen fibers, normotrophic and interspersed with elastic fibers without elastosis. With the Gomori staining is highlighted the fact that collagen fibers of type III are well stimulated.
