THE REAL INNOVATION

of our patented production method is based on a technique of filtering the hydrogels under a vacuum, without exposing them to high temperatures.

This means that the hyaluronic acid, vitamins and peptides we mix in our formulations are preserved during the whole production chain, to guarantee high standards of quality and shelf life stability.

NTS® TECHNOLOGY

HYALURONIC ACID

ARES® range is based on a mixture of 3 different molecular weights of hyaluronic acid and specific formulations for each different function.

The HA we use is CE-marked and FDA certified to be used as injectable.

ARES® AA ANTI-AGE
