# RAINBOW THREAD

GLOBAL STANDARD OF PDO · PLLA · PCLA THREADS

## Clinical benefits of Rainbow Thread

**SAFETY**

- 100% biodegradable raw material such as PDO, PLLA, PCLA
- It has been used on surgical suture for a long time
- Not harmful to the human body

**EFFECTIVENESS**

- Mono type is very effective for skin rejuvenation and skin tightening
- Cog type has high lifting performance for sagging skin

**LONGEVITY**

- Extended degradation period due to innovative technology in manufacturing process
- New materials such as PLLA and PCLA have extended long lasting effects

**SPECIALIZED**

- Complete product portfolio for each specific indication

**GLOBAL STANDARD**

- Guarantees high quality standards by strict manufacturing practice
- Comply in accordance with CE, ISO13485, KFDA and GMP standard

# PDO MONO

**PDO Mono** is a biodegradable thread recommended for its rejuvenating effect and facial tightening effect through collagen synthesis.
It also activates blood and lymphatic circulation.
It repositions the sagging skin reducing flaccidness.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Mono | 26G | 60 | 100 | 5-0 |  |
| | | 90 | 160 | | |
| | 27G | 60 | 100 | | |
| | 29G | 38 | 60 | 6-0 | |
| | | 50 | 80 | | |
| | 30G | 25 | 30 | | |

# PDO SCREW

**PDO Screw** is recommended to add volume to the treated area.
It has a greater rejuvenating effect than the PDO Mono thread because of its spiral designed thread coiled around the needle. The threads are flexible and elastic which allow them to conform to the fold's natural movement.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Screw | 26G | 60 | 100 | 5-0 | |
| | | 90 | 160 | | |
| | 27G | 60 | 100 | | |
| | 29G | 38 | 60 | 6-0 | |
| | | 50 | 80 | | |

# PDO TWIN

**PDO Twin** is a double woven thread. This design favors a greater tissue rejuvenating effect by creating a larger fibrotic pathway in the SMAS layer. This thread is recommended for skins that need redensifying and firming treatments.
The threads move naturally with the skin without the risk of being noticed or causing discomfort.

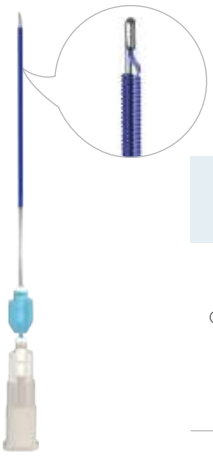
| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Twin | 25G | 38 | 60 | 6-0 | |
| | | 50 | 80 | | |
| | | 60 | 100 | | |
| | | 90 | 160 | | |
| | 26G | 38 | 60 | | |
| | | 50 | 80 | | |
| | | 60 | 100 | | |
| | | 90 | 160 | | |

# Double Screw

**Double Screw** has 2 single screws as its threads. It is designed as a screwed mono lift thread that accelerates stronger stimulation into SMAS layer and ends up forming more collagen. Double Screw thread is thicker and stronger than the regular screw so the effect for lifting the skin is more powerful than other existing PDO.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Double Screw | 25G | 38 | 60 | 6-0 |  |
| | | 50 | 80 | | |
| | | 60 | 100 | | |
| | | 90 | 160 | | |
| | 26G | 38 | 60 | | |
| | | 50 | 80 | | |
| | | 60 | 100 | | |
| | | 90 | 160 | | |

# Cavern Screw



**Cavern Screw** is a powerful collagen stimulating product which makes a hole surrounded by PDO thread. It also maximizes the contact area between subcutaneous and the thread, so it is very effective to make contour of the face with volume.

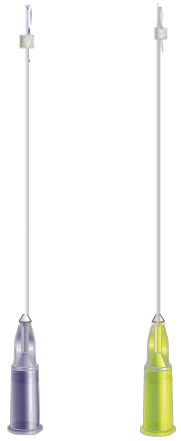
| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Cavern Screw | 21G | 90 | 60 | 5-0 | |
| | | | 75 | | |
| | 23G | 60 | 25 | | |
| | | | 30 | | |

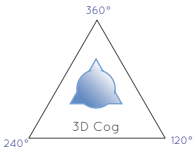
# Multi fill

**Multi Fill** is a powerful collagen stimulating product which has 14 threads in one cannula. 14 threads reach multiple areas into subcutaneous,
so it strongly boosts more collagen than normal single thread.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Multi Fill | 23G | 38 | 25 | 5-0 |  |
| | 23G | 60 | 45 | 5-0 | |

# Bi Cog / 3D Cog





## Bi Cog

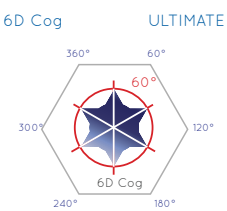
**Bi Cog** is recommended to reinforce the hold of sagging tissues, helping to reposition them and secure them in their natural position. It is used in supporting and redefining facial contours. It has a collagenesis effect which allows skin to recover its collagen and elastin

## 3D Cog

**3D Cog** triggers an immediate lifting effect. The 3D thread has 360 degree helical barbs all around the thread every 120 degrees allowing the restoration of fine lines, nasolabial folds and flaccid skin through its strong positioning and anchoring effect.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Bi Cog / 3D Cog | 19G | 100 | 150 | 1-0 |  |
| | 21G | 90 | 150 | 2-0 | |

# 6D Cog / ULTIMATE 6D Technology with 4 Cycles



## 6D Cog

**6D Cog** has 360 degree helical barbs all around the thread every 60 degrees. This is considered to be the optimal degree for the best anchoring effect in the SMAS layer. 6D Cog treats fine lines, nasolabial folds and flaccid skin. It also accelerates circulation, triggering collagen production providing radiance to your skin.

## ULTIMATE 6D Technology 4 Cycles

**Ultimate** is the most upgraded version of the cog series. Through its design that divides the 6D cog thread into 4 cycles, it guarantees the most advanced space concept that delivers superior fixation and anchoring effect.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| 6D Cog / Ultimate Cog | 19G | 100 | 150 | 1-0 |  |
| | 21G | 90 | 150 | 2-0 | |

# ULTRA and ULTRA+

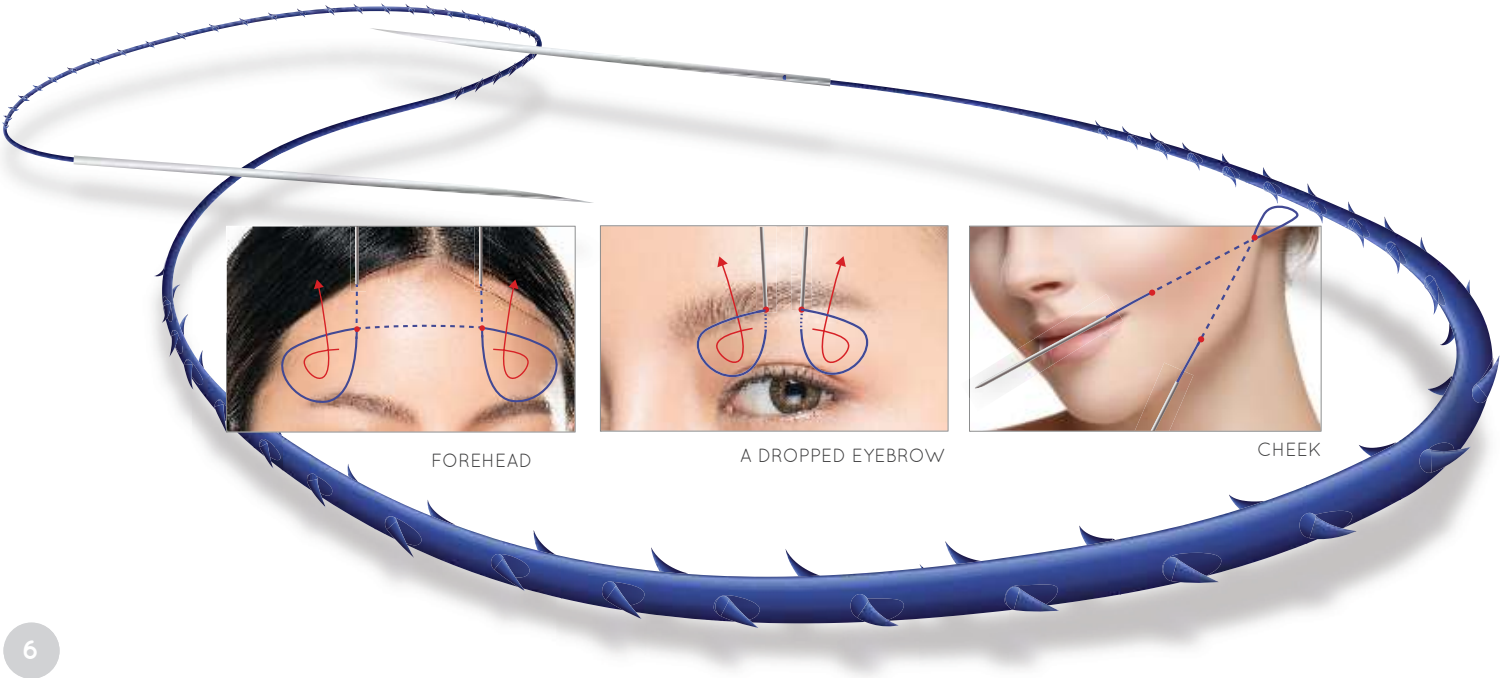
**The Ultra and Ultra+** have a thinner thread (USP 5-0) than the other cog threads (USP 1-0/2-0); but it still holds a strong tensile force. This technology raises high satisfaction levels in both patients and physicians because of its reduced pain and discomfort during the treatment.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Ultra Cog | 27G | 38 | 70 | 5-0 | Inside (Mono) |
| | | 60 | 100 | | |
| | | 90 | 160 | | |
| Ultra+ Cog | 25G | 38 | 130 | 5-0 | Inside (Bl Cog) |
| | | 60 | 185 | | |
| | | 90 | 210 | | |

# DUAL ARM 2 Needles

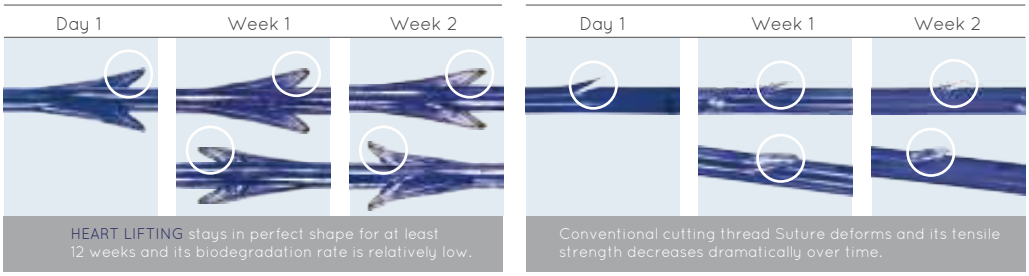
**The Dual Arm** uses cog threads with two needles attached at the end of each thread and it is widely used in the forehead, dropped eyebrows, cheeks and more.
Dual arm presents stronger and efficient lifting performance.
During the procedure, it lifts a wider surface area when compared to cog threads with single needle.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Dual Arm | 21G | 110 | 300 | 1-0 | |
| | | | 420 | | |



# HEART LIFTING

**Heart Lifting** is the newest cog thread designed with molding technology different from the existing cutting cog method.
Unlike the cutting type cogs, the molding cog is not damaged.
during the manufacturing process because its production is accomplished by compression of the thread in a mold.
This technology prolongs the biodegrading period that provides longer lasting effect.
Its unique heart-shaped design enables the thread to maximize the lifting performance.



HEART LIFTING (Molding Type) | Cutting Type

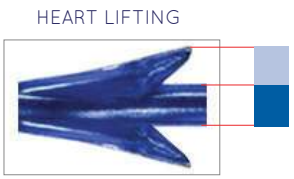
## Tensile Property

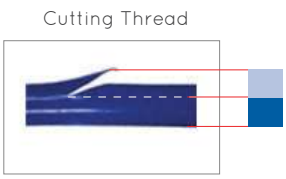
HEART LIFTING has 0.571 - 0.610mm
of diameter which is USP Size 2 for stronger tensile strength.

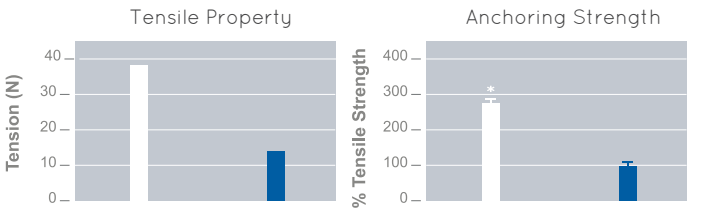
3D Cone configuration barb

## Anchoring Strength

Less damage to the thread through molding production method enables
HEART LIFTING stay stronger when pulling sagging skin.







(* : P value < 0.05, T-test ) Ref) Manufacturer lab test

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Heart Lifting | 18G | 100 | 185 | 1-0 | |
| | 19G | 100 | 185 | 2-0 | |
| | 19G | 100 | 185 | 2 | |

# PLLA MONO / SCREW / COG

PLLA : poly-L-lactic acid

- Excellent safety record over 30 years
- Rejuvenating effect – increased collagen production
- Long lasting results – generally longer lasting than PDO threads
- Naturally broken down within the body over about 18 months
- Results last around 24 months and wear off gradually

MONO / SCREW / COG

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| PLLA Mono | 27G | 38 | 60 | 5-0 | |
| | | 60 | 100 | | |
| | 29G | 38 | 60 | 6-0 | |
| | | 50 | 80 | | |

MONO

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| PLLA Cog | 19G | 100 | 150 | 2-0 |  |
| | 21G | 60 | 110 | 3-0 | |
| | | 90 | 150 | | |

COG

# PCLA MONO / SCREW / COG (The 4th Generation Material)

PCL (Polycaprolactone) + PLLA (Poly-L-Lactic Acid) = PCLA ( Poly L-lactide-co-ε-caprolactone)

This is a copolymerized absorbable components of PCL and PLLA with more than 120 years of history and unrivaled technology in the textile and medical fields

* Long biodegradation period compared to PDO - Same raw material used for APTOS and Happy Lift
* Long-lasting effect - Longer biodegradation period of 12-18 months

MONO / SCREW / COG

* Ideal Solidity

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| PCLA Mono | 27G | 38 | 60 | 5-0 |  |
| | | 60 | 100 | | |
| | 29G | 38 | 60 | 6-0 | |
| | | 50 | 80 | | |

MONO

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| PCLA Cog | 19G | 100 | 150 | 2-0 |  |
| | 21G | 60 | 110 | 3-0 | |
| | | 90 | 150 | | |

COG

# GOLD Embossing / Cog Gold - 99.99%

Cog / Embossing

- Completely Absorbable PDO Thread nano-coated with 99.99% Pure Gold
- Brightening, whitening and tightening effect
- Increases skin vitalization, improves dark circles and eliminates freckles
- Gold delays degradation time (2 times the longevity)
- Embossing creates more collagen than Mono.
- Gold Cog gives brightening, whitening and tightening effect with powerful lifting

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Gold Embossing | 27G | 60 | 100 | 5-0 | |
| | 29G | 38 | 60 | 6-0 | |
| | | 50 | 80 | | |

EMBOSSING

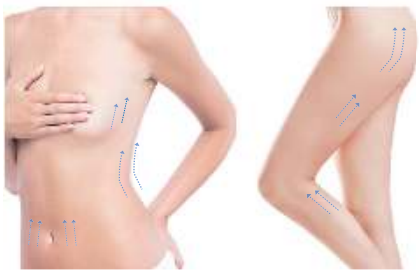
|---|---|---|---|---|---|
| Gold Cog | 19G | 100 | 165 | 1-0 | |

COG

# APPLICATION

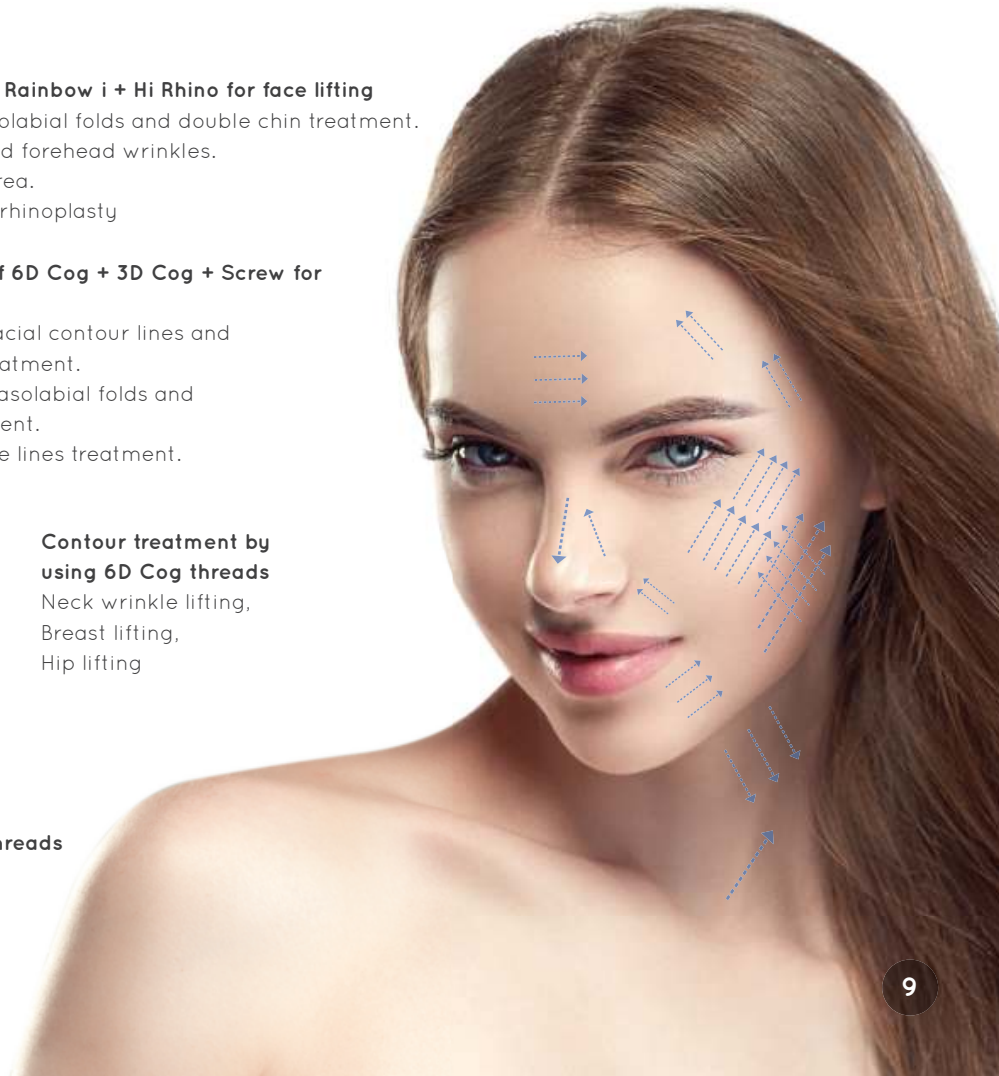
**The combination of 6D Cog + Dual Arm + Rainbow i + Hi Rhino for face lifting**
6D Cog is for the facial contour lines, nasolabial folds and double chin treatment.
Dual Arm is for the treatment of cheek and forehead wrinkles.
Rainbow i is specially designed for eye area.
Hi Rhino is ideally made for non-invasive rhinoplasty

**The combination of 6D Cog + 3D Cog + Screw for face lifting**
6D Cog is for the facial contour lines and nasolabial folds treatment.
3D Cog is for the nasolabial folds and double chin treatment.
Screw is for the fine lines treatment.



**Contour treatment by using 6D Cog threads**
Neck wrinkle lifting,
Breast lifting,
Hip lifting

**Body lifting treatment by using 6D Cog threads**
Forearm lifting,
Abdominal lifting,
Calf lifting.



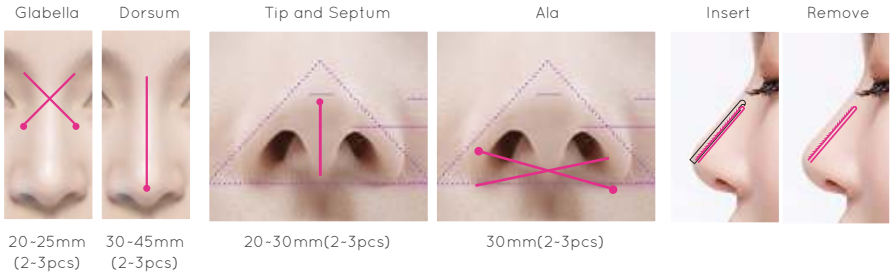
# HI RHINO

Ideal nose angle

Sharp nose tip

Natural nosewing

**Hi Rhino** is the cog thread ideally made for non-invasive rhinoplasty.
The thread is inserted into the septum, dorsum, tip and ala of the nose.
This bi-directional cog provides fixing
and anchoring effect lifting the shape of the nose minimizing damages of skin tissues.



| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Hi Rhino | 19G | 38 | 50 | 2 | |
| | | 60 | 80 | | |

# Rainbow$^{i}$

**Rainbow i** is a mono thread with U cannula
that has been especially developed to treat the eye area
removing dark circles, wrinkles, and bags under the eyes.
It causes less bleeding, swelling and bruising
by avoiding blood vessel damages.
Rainbow i increases collagen stimulation giving
satisfactory results around the eye area.

| Model | Needle Gauge (Gauge) | Needle Length (mm) | Thread Length (mm) | Size (USP) | Product Image |
|---|---|---|---|---|---|
| Rainbow$^{i}$ | 30G | 25 | 30 | 6-0 | |
