LUMINESCENS®

DEPIGMENTING & BRIGHTENING SOLUTION

PROGRAM

!!! READ CAREFULLY !!!

For best results, please strictly adhere to in-clinic and at-home protocols described here.

LIGHT PIGMENT

In clinic | At home | Morning | Evening

1st MONTH

DAY 1

#1st LUMINESCENS® Mesotherapy application:

Optional
- Complete a **BioRePeelCl$_3$® FND** peel STANDARD Protocol (Leave on the area for 5 minutes)
- Clean off with water and gauze.
- If a cleanser is to be used then use a gentle mild cleanser.

LUMINESCENS® Protocol:

IN CLINIC	
#1	Draw product from the **LUMINESCENS® Mesotherapy** vial into a syringe.
#2	Have your mechanical device available now. Apply half dose from the syringe and microneedle/ channel/stamp the patient's targeted area until erythema appears. **The advisable microneedling depth is 0.25 mm to 0.5 mm,** to be adjusted based on skin thickness. No bleeding should occur during the treatment. Once the first pass is complete, immediately apply the second half dose and microneedle again.
#3	Once treatment is complete, clean face with water and gauze. **No Cleansers** necessary.
AT HOME	
#4	Send the patient home with the **LUMINESCENS® Home Cream**. The cream is to be used that evening on the areas of concern (pigmented treated area).

DAY 2-7

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed twice a day in the morning and evening, only on the areas of concern.

Home care will even out the pigment over time to line up with the brightening work on the rest of the face.

DAY 8-13

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

DAY 14

#2nd LUMINESCENS® Mesotherapy application:

LUMINESCENS® Protocol:

IN CLINIC	
#1	Draw product from the **LUMINESCENS® Mesotherapy** vial into a syringe.
#2	Have your mechanical device available now. Apply half dose from the syringe and microneedle/ channel/stamp the patient's targeted area until erythema appears. **The advisable microneedling depth is 0.25 mm to 0.5 mm,** to be adjusted based on skin thickness. No bleeding should occur during the treatment. Once the first pass is complete, immediately apply the second half dose and microneedle again.
#3	Once treatment is complete, clean face with water and gauze. **No Cleansers** necessary.
AT HOME	
#4	Send the patient home with the **LUMINESCENS® Home Cream**. The cream is to be used that evening on the areas of concern (pigmented treated area).

DAY 15-27

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

At home care: 2nd MONTH

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

At home care: 3rd MONTH

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

At home care: 4th MONTH

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

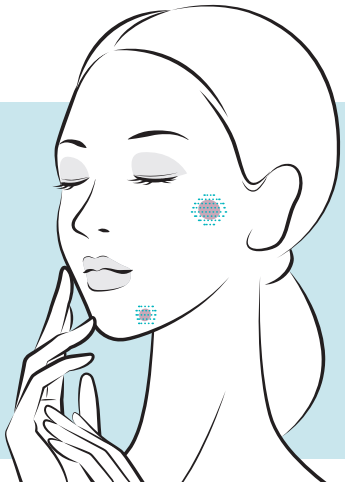

HOW TO APPLY

LOCALIZED AREA OF PIGMENTATION (PIH, post pregnancy).

Apply the **LUMINESCENS® Mesotherapy** and **LUMINESCENS® Home Cream** directly to the spot and include an additional 1 cm of coverage beyond the extents of the spot as well.

It is not recommended to draw more than twice from a vial (to reduce risk of infection).

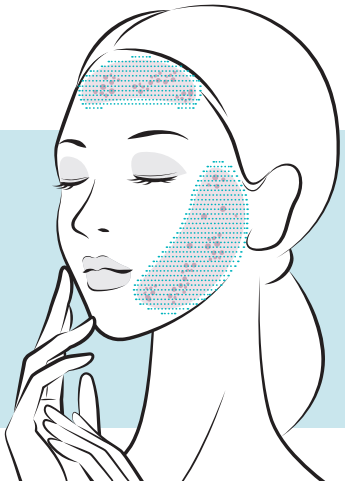

PIGMENTED AREA TO BE TREATED OVER A LARGE SURFACE (wide spots, lentigo solaris, multiple single spots).

Apply the **LUMINESCENS® Mesotherapy** and **LUMINESCENS® Home Cream** all over the face.

2mL required for a session.

Use your professional opinion and discretion when consulting the patient.
When unsure, feel free to take images and ask us for an opinion on protocol.

DEEP PIGMENT

In clinic | At home | Morning | Evening

1st MONTH

DAY 1

#1st LUMINESCENS® Mesotherapy application:

Optional
- Complete a **BioRePeelCl$_3$® FND** peel STANDARD Protocol (Leave on the area for 5 minutes)
- Clean off with water and gauze.
- If a cleanser is to be used then use a gentle mild cleanser.

LUMINESCENS® Protocol:

IN CLINIC	
#1	Draw product from the **LUMINESCENS® Mesotherapy** vial into a syringe.
#2	Have your mechanical device available now. Apply half dose from the syringe and microneedle/ channel/stamp the patient's targeted area until erythema appears. **The advisable microneedling depth is 0.5 mm up to 1 mm** depending on estimated depth of pigment and skin thickness. No bleeding should occur during the treatment. Once the first pass is complete, immediately apply the second half dose and microneedle again.
#3	Once treatment is complete, clean face with water and gauze. **No Cleansers** necessary.
AT HOME	
#4	Send the patient home with the **LUMINESCENS® Home Cream**. The cream is to be used that evening on the areas of concern (pigmented treated area).

DAY 2-13

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed twice a day in the morning and evening, only on the areas of concern.

Home care will even out the pigment over time to line up with the brightening work on the rest of the face.

DAY 14

#2nd LUMINESCENS® Mesotherapy application:

LUMINESCENS® Protocol:

IN CLINIC	
#1	Draw product from the **LUMINESCENS® Mesotherapy** vial into a syringe.
#2	Have your mechanical device available now. Apply half dose from the syringe and microneedle/ channel/stamp the patient's targeted area until erythema appears. **The advisable microneedling depth is 0.5 mm up to 1 mm** depending on estimated depth of pigment and skin thickness. No bleeding should occur during the treatment. Once the first pass is complete, immediately apply the second half dose and microneedle again.
#3	Once treatment is complete, clean face with water and gauze. **No Cleansers** necessary.
AT HOME	
#4	Send the patient home with the **LUMINESCENS® Home Cream**. The cream is to be used that evening on the areas of concern (pigmented treated area).

DAY 15-27

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

Very dense pigmentation may require application of the **LUMINESCENS® Home Cream** twice daily for the whole first month.

2nd MONTH

DAY 28

#3rd LUMINESCENS® Mesotherapy application:

LUMINESCENS® Protocol:

IN CLINIC	
#1	Draw product from the **LUMINESCENS® Mesotherapy** vial into a syringe.
#2	Have your mechanical device available now. Apply half dose from the syringe and microneedle/ channel/stamp the patient's targeted area until erythema appears. **The advisable microneedling depth is 0.5 mm up to 1 mm** depending on estimated depth of pigment and skin thickness. No bleeding should occur during the treatment. Once the first pass is complete, immediately apply the second half dose and microneedle again.
#3	Once treatment is complete, clean face with water and gauze. **No Cleansers** necessary.
AT HOME	
#4	Send the patient home with the **LUMINESCENS® Home Cream**. The cream is to be used that evening on the areas of concern (pigmented treated area).

DAY 29-41

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed twice a day in the morning and evening, only on the areas of concern.

Home care will even out the pigment over time to line up with the brightening work on the rest of the face.

DAY 42

#4th LUMINESCENS® Mesotherapy application:

LUMINESCENS® Protocol:

IN CLINIC	
#1	Draw product from the **LUMINESCENS® Mesotherapy** vial into a syringe.
#2	Have your mechanical device available now. Apply half dose from the syringe and microneedle/ channel/stamp the patient's targeted area until erythema appears. **The advisable microneedling depth is 0.5 mm up to 1 mm** depending on estimated depth of pigment and skin thickness. No bleeding should occur during the treatment. Once the first pass is complete, immediately apply the second half dose and microneedle again.
#3	Once treatment is complete, clean face with water and gauze. **No Cleansers** necessary.
AT HOME	
#4	Send the patient home with the **LUMINESCENS® Home Cream**. The cream is to be used that evening on the areas of concern (pigmented treated area).

DAY 43-56

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

5th MONTH

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

6th MONTH

At home care:

Apply **LUMINESCENS® Home Cream** by massaging until completely absorbed once per day in the evening.

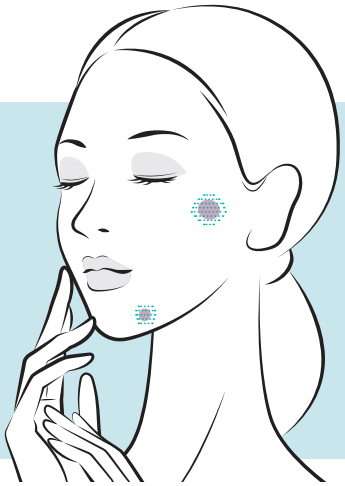

HOW TO APPLY

LOCALIZED AREA OF PIGMENTATION (PIH, post pregnancy).

Apply the **LUMINESCENS® Mesotherapy** and **LUMINESCENS® Home Cream** directly to the spot and include an additional 1 cm of coverage beyond the extents of the spot as well.

It is not recommended to draw more than twice from a vial (to reduce risk of infection).

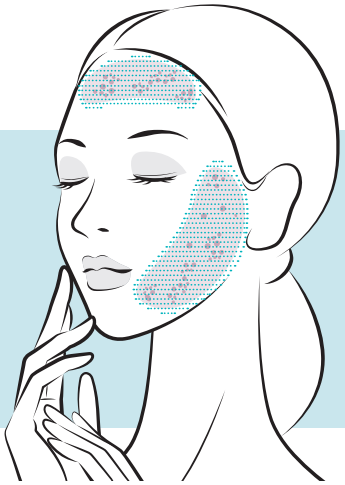

PIGMENTED AREA TO BE TREATED OVER A LARGE SURFACE (wide spots, lentigo solaris, multiple single spots).

Apply the **LUMINESCENS® Mesotherapy** and **LUMINESCENS® Home Cream** all over the face.

2mL required for a session .

Use your professional opinion and discretion when consulting the patient.
When unsure, feel free to take images and ask us for an opinion on protocol.

WARNINGS:

• LUMINESCENS® can only be used on acquired pigmentation for conditions such as melasma, post inflammatory hyperpigmentation, sun damage and sun spots. The product is not to be used on brown birthmarks or moles. Any doubt about the condition requires a dianosis and assessment from a dermatologist.

• Keep out of reach of children.

• Store in a dry and cool place with a temperature range between 41 and 68 °F.

• Keep away from sources of heat and light.

• Avoid during pregnancy or when breast feeding.

• Before proceeding with the application, check for any sensitivity to the ingredients.

• Sun protection measures are recommended during the whole program.

CONTRAINDICATIONS:

• BHA's, AHA's, retinols (our home care has some retinol in it, there is no need for more)

• Steroids

• Pregnancy or breastfeeding

• Antibiotics (must be minimum one week antibiotic free)

• Any other facials or work done on the face is strongly discouraged for the duration of the LUMINESCENS program as this will alter the patient results!

• Sun beds

CONSULT YOUR PATIENT

• Take Before and After pictures.

• Assess the pigment and melasma.

• Is it covering a large portion of the face or is it spots? (this will determine application of meso)

• Is the pigment/melasma deep? Or is it subtle/shallow? This will determine how many mesotherapy treatments needed (2 or 4 Treatment Plan)

• Discuss contraindication checklist!

• Patient should always sign waiver
